Stain Resistance	Class A - Class E	Class B	Class B	C 1378

\*\* Dynamic Coefficient of Friction (DCOF) - Water, oil, grease or other fluids create slippery conditions. When installing floors in areas with exposure to these conditions, a minimum D.C.O.F. value of 0.42 is required. Additionally, extra caution is required with regards to product selection and proper maintenance. Visit [www.tcnatile.com](http://www.tcnatile.com) for complete information regarding the DCOF AcuTest test method and values.  
 \*\*\* DCOF AcuTest is the industry designation for the test procedure contained in ANSI A137.1 Section 9.6, which has been extensively researched, allows for in-situ field measurements, and is in use at the manufacturing facilities. It was so named to distinguish it from other DCOF measurements using different instruments and/or protocols.

(sistemT graniti)

Color and other aesthetic features shown are as close as the limitation of the printing process will allow. We have tried to make this brochure as comprehensive and factual as possible. We reserve the right, however, to make changes at any time, without notice, in colors, materials, packaging, specifications and availability. Since some information may have been updated since time of printing, please check with Marazzi Architectural Customer Service for details.

# Graniti

UNGLAZED THROUGH BODY PORCELAIN STONEWARE | RECTIFIED

High-tech and high performance – intrinsic qualities showcased in the eleven-color Graniti line of unglazed porcelain stoneware. Subtle micro-granules of color accent Graniti's broad array of sought-after shades and extend throughout the body of the tile. Matte and Rock texture options offered in multiple sizes position Graniti as an ideal choice for wall and floor installations. Not only does it perform well in commercial and outdoor environments, but it is also an increasingly popular option for residential spaces.

The forgiving nature of the speckled design plus the low porosity of the tile's body results in minimal maintenance requirements. An integral part of Marazzi's Sistem Color Matrix, Graniti elements are designed to fully interact with the Cromie and Kaleidos components of SistemT as well as with SistemN and SistemA products.
