

## **HARMONY™ by Marazzi USA – Modern Exotic Wood Look Makes Your Design Passion Your Lifestyle Expression**

Four dramatically shaded wood effects reign  
on an extremely flat surface with a strong porcelain core

For Immediate Release  
SUNNYVALE (Dallas), Texas

Bold slashes of colored grain lines immediately draw attention to any floor or wall surfaced with Marazzi's new HARMONY™ color body porcelain. The rectified 6"x36" and 9"x36" sizes further emphasize the linearity of the design. Although the face of the tile is very flat, subtle natural graining is apparent – compliments of ever-evolving 3d digital imaging. Take a design passion and make it a lifestyle expression with this modern exotic wood look.

Three modern shades of brown plus one of white bring a fully functional palette to HARMONY™. Chord (black/cherry), Note (grey brown), Pitch (red brown) and Tone (white) can be used individually or together to produce your latest personal opus. Consider the drama of installing the pieces vertically on walls or in a chevron pattern horizontally. Those with daring spirits and soaring imaginations will relish HARMONY™.

Looks like wood but performs better – another advantage HARMONY™ brings. Porcelain is impervious and withstands water as well as freezing conditions when most woods cannot. So, outside is OK – even with temperature extremes there's no peeling, fading or cracking (this collection would be ideal for ventilated wall systems). Showers, bathrooms and saunas are OK – extreme heat and moisture won't affect HARMONY. Outdoor living areas, walkways and pool decks are OK – freeze-thaw conditions won't result in spalling or cracking.

21% recycled content plus no VOC emissions align with low life cycle costs, a hygienic surface and domestic availability to position HARMONY™ as a highly desirable choice for modern families, as well as architects and designers.

### **About Marazzi**

Marazzi has a strong presence in the tradition of tile manufacturing. Marazzi USA has been domestically producing tile at the Sunnyvale, Texas facility for nearly 30 years. In addition, a manufacturing plant in Florence, Alabama as well as a second plant in Sunnyvale produce highly durable and aesthetically-pleasing porcelain tile.
