

SAN SAVINO™ by Marazzi USA – Ancient Rustic Concrete Translated with Modern Industrial Vibe

Old-world concrete feel lends a slightly edgy, distinctly contemporary touch to private and public spaces without the challenges

For Immediate Release
SUNNYVALE (Dallas), Texas
April 29, 2014

SAN SAVINO – another phenom porcelain by Marazzi USA – elevates the timeworn character of old world rustic concrete to a place of prestige in modern, urban settings. Dramatic shade gamuts and worn, gentled edges combine with the authentic distress of stains and water discolorations, creating robust counterpoint for contemporary furnishings and spaces.

Big, bold planks and squares in 12"x24", 18"x36" and 20"x20" formats leverage three dynamic natural shade ranges of beige, charcoal and grey to recreate authentic concrete colorplays and patterns. The direction rests in your hands. Begin the self-expression inside the home and transition to outdoor living areas or begin with exterior walkways and gathering spots, then move indoors to hospitality venues. Mesh-mounted 2"x2" mosaics lend additional design opportunity and flair since they can be used as full 12"x12" sheets or cut into smaller squares or strips. Add the perfect finishing touch to any installation with bullnose, cove base and out angle trims.

No longer just an industrial product, concrete items are currently impacting interior/exterior landscapes in varied ways. With SAN SAVINO, many attributes of the porcelain rendition surpass the inspiration material. Create the on-trend impression of concrete without the challenges. Installation on floors, walls, and countertops (both indoors and out) is simpler; no sealing or coloring is required; weight loads are less; lower porosity challenges allergen and mold formation.

Environmentally and user friendly, SAN SAVINO contains 21% recycled content, emits no harmful VOCs, has a low life cycle cost, meets DCOF Minimum 0.42 Wet for slip resistance and requires no strong chemicals to clean.

About Marazzi

Marazzi has a strong presence in the tradition of tile manufacturing. Marazzi USA has been domestically producing tile at the Sunnyvale, Texas facility for over 30 years. In addition, a manufacturing plant in Florence, Alabama as well as a second plant in Sunnyvale produce highly durable and aesthetically-pleasing porcelain tile.
